15/3/18.

We, the citizens of Kaputiei-North ward, petition the senate of the republic of Kenya regarding lack of cooperate social responsibility in as far as employment of the local community is concerned.

We have noted with great concern that most of the companies listed below source their work force from outside our county and ward.

We the people of this ward have incessantly tried to talk to the proprietors and management of these companies to try and in cooperate the local community work force as a way of fostering good neighborliness to no avail..

We are therefore demanding that this honorable house look into this matter with the aim of forcing the proprietors of these farms to at least employ 2/3 of the local community in their companies
