| | <p>raised serious concerns over the improper disposal of avocado pomace, which produces a pungent odour, attracts mosquitoes, and poses significant public health and environmental risks. These conditions undermine the right to a clean and healthy environment guaranteed under Article 42 of the Constitution. Noting that avocado processing generates large volumes of organic waste, including peels, seeds, pulp, and pomace, which, when improperly managed, cause environmental degradation, water contamination, and increased greenhouse gas emissions. Cognizant that under Part 2 of the Fourth Schedule of the Constitution, waste management is a devolved function of county governments, while the national government retains the responsibility of formulating policies and frameworks to guide and support counties in effective waste management. Appreciating that studies by the <i>Food and Agriculture Organization (FAO, 2023)</i> and global best practices from Mexico and Chile demonstrate that avocado waste can be converted into biofertilizer, biogas, animal feed, and other value-added products, thereby reducing pollution, creating employment opportunities, and supporting a circular economy.</p> | | | | | | |
