(i) The Local Content Bill (National Assembly Bill No. 45 of 2025)
(The Hon. Jane Kagiri, M.P.)

(ii) The Health (Amendment) Bill (National Assembly Bill No. 56 of 2024)
(The Hon. Njeri Maina, M.P.)

9*. MOTION: 007/2026 – INCLUSION OF AFLASAFE KE01 IN THE NATIONAL AGRICULTURAL INPUT SUBSIDY PROGRAMME
(The Hon. (Dr.) John Mutunga, M.P.)

THAT, aware that, Article 43(1)(c) of the Constitution of Kenya guarantees every person the right to be free from hunger and to have adequate food of acceptable quality; cognizant of the fact that, aflatoxin contamination, caused by toxic substances produced by certain fungi, remains a significant public health, food safety and economic threat in Kenya, with exposure associated with acute poisoning, chronic liver damage, cellular DNA damage and an increased risk of liver cancer; noting that, surveillance data has demonstrated widespread aflatoxin contamination in Kenya's staple foods, particularly maize and maize products, as well as animal feeds and other food products, with some samples recording aflatoxin levels substantially above the national permissible threshold of 10 parts per billion; acknowledging that biological control technology, particularly Aflasafe KE01, developed locally by the

……...../9*(Cont'd)

Kenya Agricultural and Livestock Research Organization (KALRO) in collaborationwith the International Institute of Tropical Agriculture (IITA), using safe and non-toxic indigenous fungal strains, provides a scientifically validated and field-proven pre-harvest intervention for the prevention and control of aflatoxin contamination; further acknowledging that, field applications of Aflasafe KE01, including large-scale demonstrations at the Galana-Kulalu Irrigation Scheme and in Meru County, have substantially reduced aflatoxin contamination in harvested maize; concerned that, despite the local manufacture of Aflasafe KE01 at KALRO *Katumani*, the application cost, estimated at approximately KES 1,000 per acre, remains a significant barrier to adoption by smallholder farmers, who constitute the majority of Kenya's agricultural producers; recognising the need for a preventive and integrated approach to food safety that addresses aflatoxin contamination at the farm level while strengthening public awareness, agricultural extension, food surveillance and health monitoring; now therefore, this House **resolves** that the National Government, through the Ministry of Agriculture and Livestock Development, incorporates Aflasafe KE01 as a subsidized biological agricultural input under the National Agricultural Input Subsidy Programme, prioritises its targeted provision and application in high-risk Agro-ecological zones and identified aflatoxin-endemic hotspots, particularly in the Eastern and Coastal regions, major irrigation schemes and other areas with a demonstrated history of aflatoxin contamination.

(Resumption of debate interrupted on Wednesday, November 04, 2026 – Morning Sitting)
(Balance of time – 1 hour 50 minutes)

10*. MOTION: 006/2026 – NATIONAL SENSITISATION AND SUPPORT FOR COMBATING SICKLE CELL AND HAEMOPHILIA DISEASES
(The Hon. Peter Nabulindo, M.P.)

THAT, aware that Article 43(1) of the Constitution entitles every person to the right to the highest attainable standard of health, which includes the right to health care services; further aware that, every year, an estimated 14,000 children born in Kenya suffer from sickle cell and Haemophilia diseases, with the highest prevalence rate being within Western, Nyanza and Coastal Regions; concerned that, failure to undertake sickle cell and Haemophilia screening at birth hinders timely administration of appropriate treatment and other mitigation measures to forestall high infant mortality caused by preventable diseases like malaria; cognizant that, national population surveys does not include data on sickle cell and Haemophilia diseases; concerned that, the dearth of data and information negatively hinders prioritization of resources and implementation of sickle cell disease management programs; recognizing that, the number infant deaths caused by the disease continues to grow as a result of underfunding due to lack of data on the number of cases of the killer disease; now therefore, this House **resolves** that the National Government, through the Ministry of Health, and in conjunction with county governments–

(i) conducts awareness and sensitization programmes on sickle cell and haemophilia diseases and supports research and training for medical personnel on the two diseases; and

……...../10*(Cont'd)

(ii) puts in place measures for mandatory screening of newborns sickle cell and haemophilia diseases in all public health facilities in the country in order to create a database to guide funding and other interventions aimed at curbing the diseases and reducing infant mortalities resulting from the diseases.
